SuccessFactors Data Loader.

Loading Data from Successfactors

Modern Hybrid Cloud infrastructure presents new sets of challenges to your organization, as you seek to keep data updated from your Successfactors Cloud solution to downstream systems, such as SAP.

Introducing SDX

Sapienz Data Xchange (SDX) draws on decades of experience with HCM processes in SAP, to load data correctly into your system, so you can use it in other processes outside HR.

A secure, stable and inexpensive solution

Because of our middleware-free approach to integration, we keep cost down to an absolute minimum, while maintaining a very flexible solution, to take care of all current and future events in your employees worklife. SDX transfers data fast and securely.

- **No additional infrastructure** is required, everything is run directly from your SAP ERP installation.

- **No additional updates** are required. SDX is compatible with everything from Netweaver 7.4O, up to and including S/4 HANA.

- **No SAP Gateway** is required. Even though the app for managing the solution is a full blown Fiori app, SAP Gateway is not required to run it.

- **A fraction of the cost**, of other types of integration solutions.

- **Act agile!** Control of mappings are given to your HR Business Experts, eliminating the need for consultants and IT

- **Everything you need** to run the integration is contained in one package!

SAP SuccessFactors → **SDX** → **SAP**

easy, simple, flexible and scalable.
